PROJECTS

AI Radio
Flutter | Alan AI

- AI-controlled radio app in which the user can command the app with the voice
- 'PLAY SOME MUSIC' will play the radio and asking to stop the music will do it too.

Zappit
Django | Sqlite3

- Rest Api for a social media platform.
- Users can login, post content as well as upvote them.
- Admin panel to manage the database.

Weber Chatrooms
Flutter | Firebase

- An application where users can chat anonymously
- Firestore is used as the database.
